

# Project 4: CoPilot App

**MÄLARDALENS HÖGSKOLA  
ESKILSTUNA VÄSTERÅS**

# Project plan

We have created an initial project backlog, which contains items that are mostly related to:

- Effort estimation
- High-level design
- Detailed design
- Acquiring software

## Schedule decided

Monday	Tuesday	Wednesday	Thursday
13:30h-15h. Team meeting.			13:30h-14:30h. Team meeting.
15h-15:25h. Meeting with the steering group.			14:30h-15:30h. Client meeting.

# More work done so far

What we have done since the last meeting:

- Created a mock app to show our client the idea we have of the product.
- Wrote the first version of the project plan and reviewed it.
- Started an Android Studio project.
- Had a meeting with the client and solved some questions regarding the requirements.
- Prepared use cases for the meeting with the client and edited them after the meeting to match the new requirements specifications.
- Created activity diagrams for the initial use cases and edited them further.
- Chose a database system.
- Meeting with the team to prepare this presentation.

# Expected work for next week

What we expect to have finished by next week's meeting:

- UML diagrams.
- Project plan.
- Create a database.
- Bind Firebase services with the Android Studio project.
- Next week's presentation of the project plan.
- Weekly Skype call with the client to present the UML diagrams and to talk about the project plan and initial developing questions.
